International Webinar on Oncology Research and Treatment
February 10 2022 | GMT+1

Online Webinar Sessions

10:00–10:20	Title: Microwave Mammography
	Yoshihiko Kuwahara , Aichi Medical University, Japan
10:20–10:40	Title: Lymph node metastasis in cT1/T2 buccal mucosa squamous cell carcinoma
	Rajesh A Kantharia , KCHRC, India
10:40–11:00	Title: Evolution of radiation therapist from classical era to modern era
	Vinay Kumar Varun , Kailash Cancer Hospital and Research Center, India
11:00–11:20	Title: Validation of absolute point dosimetry by the analytical anisotropic algorithm and acuros XB algorithm employing intensity-modulated radiotherapy technique on an in-house develop cost-effective heterogeneous thorax phantom.
	Priyusha Bagdare , Vikram University, India
11:20–11:40	Title: Xanthogranulomatous cholecystitis- a close mimicker of advanced gallbladder cancer
	Sabina Khan , Hamdard Institute of Medical Sciences & Research, India
11:40–12:00	Title: A Clinicopathological study to evaluate immunohistochemical markers in endometrial carcinoma
	Jasmeen Kaur , All India Institute of Medical Science, India
12:00–12:20	Title: Bone marrow study; report of chromosomal variations in hematologic malignancies including acute myeloid leukemia, acute lymphoid leukemia, and myelodysplastic syndrome
	Sepideh Shakeri , Mashhad University of Medical Sciences, Iran
12:20–12:40	Title: Clinical results of radiation and chemoradiation therapy of locally advanced cervix cancer
	Olga Kravets , Pirogov's Russian Medical University, Russian Federation
12:40–13:00	Title: Tumor-like diseases of the peritoneum. description of a clinical case of treatment of peritoneal inclusion cyst.
	Tatiana Barbolina , Moscow state medical University, Russian Federation
13:00–13:20	Title: The role of the peritoneal carcinomatosis index (PCI) in the treatment strategy for stage IIIc-IV serous ovarian cancer
	M.Yu. Yegorov , National Cancer Institute, Ukraine

13:20–13:40	Title: Antibody-drug conjugates used in breast cancers
	Aram Abbas , Damascus University, Syria
13:40–14:00	Title: Impact of contamination particles in the build-up region
	Mustapha Assalmi , Mohammed First University, Morocco
14:00–14:20	Title: Molecular signature for improvement of clinical prognosis accuracy in patients with superficial bladder carcinoma
	Antonova O , Sf. Constantin Hospital, Romania
14:20–15:20	Break and Refreshment
15:20–15:40	Title: Imaging and diagnosis for planning the surgical and non-surgical procedure in rectal cancer-multidisciplinary approaching
	Ferdinand Bauer , Radiology Clinics in Kaufbeuren, Germany
15:40–16:00	Title: Appearance of specific genomic aberrations in neuroblastoma suggests alternative causality and cancer modeling
	Ugo Rovigatti , University of Florence, Italy
16:00–16:20	Title: Neutrophils in rectal cancer—A review: Stage III rectal cancer patients and 5-fluorouracil therapy. Introducing new inclusion criteria and scoring system.
	Nicola Sarandria , University of Padova, Italy
16:20–16:40	Title: Hydrogen/deuterium ratio is the key regulator of cell proliferation
	Gábor Somlyai , HYD LLC for Cancer Research and Drug Development, Hungary
16:40–17:00	Title: Effect of exercise therapy on vital capacity before major abdominal surgery in cancer patients.
	Nikolina Santek , Sestre milosrdnice University Hospital Center, Croatia
17:00–17:20	Title: Proton therapy - the current situation
	Karol Sikora , Rutherford Cancer Centres, United Kingdom
17:20–17:40	Title: Vulvar cancer cryosurgery treatment, difference with usual treatment methods
	Juana Elida Mauro , Honorary Medical Consultant Gynecology Durand Hospital, Argentina
17:40–18:00	Title: Clinical aptitude of suspicion of malignant breast pathology in primary care physicians
	Susana Lopez-Rojas , Familiar Medicine Unit 20, Mexico
